

# Custom Antibody Production

Can't find an antibody to work in your application? Generate high-specificity, high-affinity application-tailored custom antibodies with our award-winning services!

## MonoRab™ Custom Rabbit mAb Generation

### MonoRab™ Custom Rabbit mAb Generation

- MonoRab™ is as short as 11 weeks!
- MonoExpress™ immunization to boost the high immune response.
- In-house screening of purified antibody and GenScript screening includes IHC, ELISA, WB, FACS, & More!

## Custom Mouse/Rat mAb Generation

- Milestone-based decision making and pricing.
- A La Carte service additions, such as ImmunoPlus™, multiple screening options, & scale up services.

## Custom Mouse/Rat mAb Generation

## Custom Mouse/Rat/Rabbit pAb Generation

### Custom Mouse/Rat/Rabbit pAb Generation

- Multiple purification methods fit every project.
- Range of delivery format to ensure your pAb working in your downstream application.

## Express mAb and pAb Generation

- Express is in as fast as 45 days!
- Packages start as low as \$899 USD.
- Choices of immunization are either with peptide or protein.

## Express mAb & pAb Generation

# Why Choose GenScript?

We are an **award-winning** custom antibody provider with over **19 years** of experience and **155,000+** antibodies successfully delivered to date!

## Proprietary Technologies

Maximize your success at achieving **high-quality antibodies**

## Award-Winning Services

2023 CiteAb winner for **Most Popular Custom Antibody Supplier**

## Specialized Services

**Antibody production, labeling, ELISA kit generation & more!**

## GenScript's Antibody Service Highlights

<b>OptimumAntigen™</b>	Design Tool Using an Advanced Algorithm to Generate Superior Antigen Sequences
<b>ImmunoPlus™</b>	Proprietary Method To Break Immune Tolerance of Highly Homologous Antigens & to Generate Surrogate Antibodies
<b>Independent Antibody Validation</b>	Epitope Binning: Monoclonal Antibodies are Tested Against One Another to Determine Which Antibodies Compete for the Same Antigenic Epitope
<b>Proprietary Adjuvant</b>	Quickly Elicits Robust and Durable Immune Response to Generate Large Titers of High Specificity Antibodies
<b>Express Immunization</b>	Can Generate Antigen to Antibody in 45 Days for Monoclonal or Polyclonal Antibody Generation
<b>High Efficiency Electrofusion</b>	Generates a Large Number of Hybridomas to Ensure High Diversity

## GenScript's Animal Facilities

GenScript houses all their rodents and rabbits for antibody generation in an OLAW and AAALAC internationally accredited animal facility. All animal protocols are used in order to minimize the pain, discomfort, and distress in animals from the production of antibodies.
